Saves and restores all color settings and drawing options.

Features:

- ❑ Very useful when more than one person works on the same design that have different preferences for color and drawing options.
- ❑ Save and restore customized layer configurations and color pallets with a single mouse click.
- ❑ Saves and restores all drawing options and preferences like grid on/off status, grid color, highlight colors, ratsnest colors, filled pads, cline endcaps, etc.

Colors for all layers and the pallet are saved/restored

Example

Suggested procedure to maintain yours and the others preferences:

1. Database is received by designer #1 from designer #2.
2. Designer #1 saves designer #2's colors to [Local #2].
3. Designer #1 restores their preset colors from [Global #1].
4. Designer #1 does work on the design with the colors exactly the way they like them.
5. After Designer #1 finishes, they restore [Local #2] colors.
6. When Designer #2 gets the layout back the colors are exactly the way they left them.
7. Everybody is happy because they have their colors the way they want them!
